Product description	Les auvents verticaux protègent du soleil les surfaces de façade ou les fenêtres disposées verticalement. La fermeture éclair soudée au tissu guide le tissu sur toute la hauteur dans les guides élégants et discrètement recouverts - et l'y maintient en toute sécurité. Cet ingénieux système de fermeture éclair permet également de réaliser de grandes surfaces. De cette façon, les stores verticaux Solozip résistent même aux vents forts.
